- X (BSEB) High School Piro *percentage: 65.6% | (2017)*

ACADEMIC PROJECTS

❖ Quiz Generator

This Quiz Generator is a versatile and user-friendly project designed to create customized sets of questions on any subject. Whether you're a teacher, student, or quiz enthusiast, this tool allows you to tailor quizzes to your specific needs

Tools Used: html, CSS, JavaScript, python-flask

 [IndraAI \(indra-pvt.vercel.app\)](https://indra-pvt.vercel.app)

❖ Bihar Travel & Tourism Management system

The Tourism Management System optimizes administrative processes, managing customer details, hotel bookings, and tourism information exclusively for administrators with secure backend access. Its core objective is to develop an application that markedly minimizes manual efforts in handling tourists, bookings, and places.

Tools Used: Java, swing for GUI, MySQL

 <https://github.com/indra-321/Bihar-Tourism-Management-System.git>

❖ Blood Bank Management System

This project is created for two users: Donors/Receivers and Hospitals/Clinics (Doctors), where a hospital user can add blood sample to their blood bank, request for blood, check status of their request, update their details, etc. The donor/receiver can also do the same.

Tools Used: html, CSS, JavaScript, Bootstrap, PHP, MySQL

 <https://github.com/indra-321/Blood-bank-Management-System.git>

❖ DESIGNING AND DEVELOPMENT OF PERSONAL PORTFOLIO WEBSITE

I designed and developed my own portfolio website. HTML , CSS and JS is used in the development of website.
